DATE SET FOR THE ELK'S INSTITUTION

Wednesday, April 11, is the date set for the Institution of the Carbon branch of the Order of Elks and Tony McKinley, the organizer says that it is going to go over with a bang. He finds that the people here are imbued with the spirit of sociability, good fellowship and mutual co-operation, which is the first essential in the successful functioning of a Branch of Elks and the attainment of its aims, which are embodied in the Elk Motto, "To make life sweeter, men better, and the world happier."

Most men are right at heart; all they require is a common ground on which to give expression to their genuineness of purpose.

The Elk Order is for men of any age. With its program of mutual helpfullness it attracts the best in every community. With its program of fun and light heartedness it delights all men who have not become chronic grouches and who have not passed the age of 90.

The kiddies are for the Elks, and all the children say that the Elks are friends of theirs, and for these good men they pray.

The townsmen are giving the movement excellent support and their message and invitation to the farmer is "come on in, the water's fine, we want to know you better, we want to meet you oftener, not just to sell you groceries and hardware and pills and things, but to fraternalize and rub elbows, in the spirit of play and community friendliness.

Trochu Elks have phoned that they will be well represented, as well as will Three hills. Calgary will also be represented. Sam Savage, President of the Alberta Elks Association will be here.

Applicants are again reminded that if they have paid their fee, they will be made Charter members even though they cannot attend the first meeting.

—o—

—The Ladies Aid of the Carbon United Church, will hold a sale of cut flowers, cotted plants, and also a parcel post tea, in the Farmers' Exchange hall on Saturday afternoon, April 7th, at 3 p.m. 3t

ORATORICAL CONTEST TO BE HELD APRIL 4th

The date for the Carbon and Three Hills district oratorical contest has been set for Wednesday evening, April 4, in the Farmers Exchange hall, Carbon, when Clarence Evans of Three Hills, and Hugh MacDonald of Carbon, will battle for the oratorical honors of the two districts. Along with this contest will be a program consisting of vocal and instrumental numbers, readings, etc.

—o—

LEGISLATURE CLOSES

General satisfaction is expressed by Premier Brownlee and the members of the cabinet with the work which has been done during the session of the Legislature which prorogued on Wednesday, March 21, having sat from Feb. 2nd. A total of 79 bills were passed by the Legislature during the session, eight of which were private bills and 71 public bills.

It is considered likely that a short session of the house may be called during the summer to consider a number of matters on which final action was not possible during the recent session. The Premier expects to leave during the week for ottawa. The satisfactory disposition of the northern railway lines and the return of the natural resources to the Province will be among the problems which will engage his attention during his Eastern trip.

—o—

A Dominion Income Tax office to handle the business in the northern part of the province will be opened in Edmonton on April 1, in charge of C. S. Kilgour, who has been oppointed inspector for northern Alberta. The federal ridings of Wetaskiwin, Camrose and Battle River, and all territory in the Province north of this will be included in the Edmonton district. It is announced that all returns for Income tax purposes must be filed by April 30.

—o—

Advice was received from Ottawa Monday afternoon that April 15 is the date set for the commencement of the shipment of Alberta Coal to Ontario, under the provisions of the order-in-council granting a $6.75 freight rate to Ontario.

ST. PATRICK'S DAY TEA IS A SUCCESS

A very successful tea was held on Saturday afternoon, March 17, in the Farmers Exchange hall by the ladies of St. Gabriel's Church. Quite a number of the ladies attended.

Tickets had been sold for a rose taffeta pillow, donoted by Mrs. J. J. Greenan, and the drawing for this took place at the tea, G. Wise being the holder of the lucky ticket.

Each lady attending was given a chance to guess the weight of a pure bred white wyandotte cockerel, donoted by Mrs. Johnston. The exact weight, 6¼ lbs. was guessed by Mrs. Hudson, who took the bird as her prize. The next closest guess was made by Miss Ione Munro, who received a lovely boudoir lamp, donated by Mrs. O'Rourke.

Vocal solos were charmingly rendered by Mrs. Torrance and Mrs. Evans, both being accompanied by Mrs. McKibbin. Mrs. Malton and Mrs. Peters favored the guests with a duet, accompanied by Mrs. Wilson. Mrs. McKibbin and her sister, Miss Watkins, delighted the ladies with a piano duet.

Following the program, tea was served, and a number of the business men and farmers came in for refreshments.

Tickets for the pillow brought in $49.25 and the tea realized $33.25, including $2.00 donated by Mrs. R. Levens, who was unable to attend.

CURLING CLUB MEETING

The Annual Meeting of the Carbon Curling Club will be held in the dining room of the Hotel on Monday, April 2nd, at 8 p.m. Election of officers and other important business. A full attendance of members is requested.

Refreshments will be served, followed by a short program.

R. J. FAIRBAIRN,
Sec.-Treas.

—o—

Owing to washouts along the Drumheller-Calgary line, there has been a daily train service inaugerated between Calgary and Knee Hill to take care of the traffic and now Carbon has a temporary daily train service.

That Lovely Home

How often have you pointed your finger at your friend's or neighbor's home and said, "What a lovely Home." Do you know that you can have one just as easy if you will make up your mind to see us? Don't keep putting it off, but make up your mind now.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The Menace Of Wheat Rust

"During the last twenty years a certain parasitic fungus, known to the prophets from Moses to Burbank, has stolen half a million dollars' worth of wheat from the farmers of Western Canada."

With these introductory words, W. A. Irwin writes in a recent issue of MacLean's Magazine, of the tireless efforts being put forth in the Dominion Rust Laboratory at Winnipeg, and by the research departments of the three universities of the Prairie Provinces, to develop a rust resistant type of wheat. Mr. Irwin proceeds to say:

"Twenty years ago, Manitoba's hard bread wheat was at once the standard and the envy of the world. Last year, more than half of Manitoba's wheat crop was useless for bread-making. Why? The answer is 'rust.'

"Last year, Alberta produced four-fifths as much wheat on six and a quarter million acres as Saskatchewan produced on thirteen million acres. Why? The answer is 'rust.'

"Last year, up until the end of December, of the wheat from the entire West, only thirty-five per cent. graded Number Three Northern or better, as compared with fifty-five per cent. so graded during the previous year. Why? The answer is 'rust.'

"Last year, Manitoba produced only 30,000,000 bushels of wheat as compared with 50,000,000 bushels in 1926. Why? The answer is 'rust.'

"Nor is that the whole story. Since 1907 rust has filched an average of $25,000,000 a year from the Western wheat grower, a total of half a billion dollars. In one year, 1916, the loss from rust damage reached the colossal sum of $200,000,000. In 1923, 25,000,000 bushels of Canadian wheat that might have gone out into the markets of the world fell a prey to the rust scourge. More than that, thanks to the same scourge, it now is impossible to grow Marquis wheat in great areas of southern Manitoba and those who know best declare, without equivocation, that a similar fate would overtake all of that province and most of Saskatchewan if this new thrust of Nature were allowed to run its course unchallenged."

Even to Western farmers who know, to their own sorrow, the terrible ravages of rust, these statements, showing the enormous extent of the losses sustained, and the gravity of the menace to the future of wheat growing in the West, will come as a surprise and a distinct shock. It is revealed by these facts and figures that 'rust' is levying a heavier toll on Western farmers than customs tariffs, or freight rates, or hail, or many other things which have long commanded the attention of farmer organizations.

Rust, hail and noxious weeds are the great enemies of the Western farmer. Weeds can be eradicated through the combined efforts of rural municipal councils and individual farmers, and they can be prevented by the adoption of good farming methods, and the use of only good, clean seed. Insurance against losses by hail can be secured, even if the occurrence of hail cannot be prevented or controlled. But it has been established that rust cannot be prevented or eradicated; that there is no bread wheat in the known world that is immune from rust; that, consequently, the only hope lies in the development of a type of bread wheat that is rust resistant.

As is pointed out in Mr. Irwin's article, it is the same old story of the pioneer's audacity all over again. In the beginning, the West couldn't find a wheat that would grow fast enough to escape the spring and autumn frosts north of the forty-ninth parallel. So it called in the plant breeder and made wheats that would grow fast enough. Now it's a wheat that won't feed rust.

The story of the campaign now being waged to develop such a wheat is an inspiring one. Furthermore, the progress thus far made is highly encouraging, even though the battle is yet far from being won, or the end of the struggle in sight. Dr. Bailey, who has been in charge of the Dominion Rust Laboratory in Winnipeg, will make no definite predictions, but, he told Mr. Irwin, "I think I can say with reasonable certainty that we have succeeded in capturing rust resistance in a bread wheat type. We have several resistant lines now, some of them in the fourth generation, and they seem to be fairly stable, but we have no guarantee that they will have satisfactory quality."

It is not in itself sufficient to develop a rust resistant type of bread wheat. Such a type must also be satisfactory from the standpoint of yield per acre, early maturity, milling quality, baking quality, and all the others demanded by a wheat importing world. Therefore, added Dr. Bailey, "If quality is not satisfactory, we'll have to start breeding for it and if we can't breed for quality from the resistant lines already developed, well—we'll have to start all over again."

It is not the West alone that is vitally interested in the success of this great undertaking, but all Canada, indeed, the whole world. The Dominion Government is spending about $50,000 a year on the maintenance of this centralized rust research, a mere bagatelle compared with the average of $25,000,000 a year loss which rust imposes on the country. The experts carrying on this important work are lamentably underpaid and there is grave danger of losing their services. Farmers and business men of the West should not only insist that there be no meanness in the remuneration paid these men, and their services retained, but the Dominion Government should be urged to stop at no expense necessary to bring these really wonderful experiments to a successful conclusion at the earliest possible date.

Is Your Stomach Troubling You?

Hamilton, Ont.—"Dr. Pierce's Golden Medical Discovery is a remedy for stomach and liver trouble that I can highly recommend. Before I took it I would have spells of intense suffering, but through its use I gained in weight and health and felt just fine. My friends even commented on my changed appearance—my complexion was better and my eyes brighter."—Mrs. Caroline Nelson, 74 Steachen St. E.

People in every walk of life today say Dr. Pierce's Golden Medical Discovery has restored them to health. It is a reliable medicine made from roots and herbs, sold by druggists, in both fluid and tablets. Send 10c for trial pkg. tablets to Dr. Pierce's Laboratory in Bridgeburg, Ont.

Farmer Drives Over Explosive

Shell in War Zone Kills Four Horses and Injures Man

Death still lurks in the soil of the war zone, after ten years of methodical clearing.

Maurice Rebetok was ploughing a field at Loivre when one of the horses struck with its hoof the head of a six-inch shell buried just under the surface. It exploded, blowing the four horses to fragments and injuring Rebetok.

The following day a Polish farmhand found a three-inch shell and threw it into the air in fun to scare his comrade. It landed on the cap, exploded, and killed him.

Newspaper Men To Gather At Edmonton

Canadian Weekly Newspaper Association To Be Held In Northern City In July

At the annual meeting of the board of directors, Canadian Weekly Newspapers Association, just concluded, the city of Edmonton was selected for the annual convention of the association to be held in July, with side trips to Banff and Jasper. The position of manager of the association with head office at Toronto, Ontario, is as yet vacant, but hopes are held that a suitable man will be secured shortly. The list of candidates submitted was not satisfactory. A delegation of eastern and western members is anxious to secure the consent of S. J. Dornan, manager of the Saskatchewan division and publisher of The Alameda Despatch, to accept this position. Mr. Dornan has so far refused to leave the west.

Ancient Wood Carver Passes

Credited With Being the Originator Of Famous Cigar Store Indian

Louis Jobin, the old Quebec artist, is dead at the age of 86. He was a figure known to thousands of tourists who visited him in his little studio near the shrine of St. Anne de Beaupre and bought samples of his work. Jobin's craft was an ancient one that went back to the Indians. He was credited with being the originator of the famous cigar store Indian.

Born at St. Raymond, Portneuf county, Quebec, he was known as one of the world's greatest carvers. Perhaps his most distinctive work, and certainly his best known one, is his huge statue of the Blessed Virgin which towers above Cape Trinity at the entrance to the Saguenay River and is known as Our Lady of the Saguenay. It stands 25 feet high.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the new born babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Population Of Saskatchewan

Rural Population More Than Double the Urban

The population of Saskatchewan, as at June 1, 1926, was 820,733, an increase in the five-year period from the quinquennial census of 1921, of 63,228, according to the Dominion Bureau of Statistics at Ottawa. In this total males exceeded females by 72,134. The rural population was more than double the urban, at 578,206 compared with 242,532. In the latter seven cities, 80 towns and 360 villages are included. Regina's population is set at 37,329; Saskatoon's at 31,234 and Moose Jaw's at 19,039.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Alberta Sugar Beets

General opinion is that the beet acreage in Southern Alberta will be increased in 1928 by one-third over 1927, making about 2,000 acres in place of 1,630 acres last year. Acreis already being signed up.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

An earthquake wave has been known to travel across the Pacific Ocean at the rate of six miles a minute.

Keep Minard's in the Medicine Chest.

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child— of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, *there's nothing quite like Aspirin.* Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Recipes For This Week

(By Betty Barclay)

MINT COCKTAIL

2 oranges.
6 slices pineapple.
12 mint cherries.

Peel oranges and remove membrane from pulp; cut pulp into dice. Cut pineapple into ½-inch pieces. Put into cocktail glasses; add juice from pineapple and sprinkle with finely-minced cherries.

BAKED RAREBIT

½ to ¾ lb. mild soft cheese.
2½ cups bread crumbs.
1 2-3 teaspoons salt.
1-3 teaspoon paprika.
3 eggs.
1½ cups milk.

Cut cheese in small pieces. In buttered baking dish sprinkle layer of bread crumbs, cover with one-third the cheese and seasoning. Repeat twice. Beat eggs slightly, add to milk, and pour over mixture. Set in a pan of hot water. Bake in moderate oven 35 minutes. Serve at once.

The world's automobile speed record established by an Englishman has been broken by a fellow-countryman. The "patient plodders," it seems can hurry when the need arises.

Fire In Tower Of London

There was a lively few minutes in the Tower of London recently due to fire breaking out in one of the towers of that historic structure.

The flames were quickly extinguished.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

In nine months 150,000 persons have visited the health spas of Czecho-Slovakia, which stands as a record for health resorts.

DISTRESSING HEADACHES

Bathe the forehead with Minard's. Also inhale. Brings soothing relief.

MINARD'S "KING OF PAIN" LINIMENT

A man likes to refer to himself as an idiot at times, but it makes him mad if anybody else agrees with him.

WORLD HAPPENINGS BRIEFLY TOLD

Victoria City council voted to adopt daylight saving from April 15 to Sept. 1.

Senator Raoul Dandurand, government leader, has returned from Geneva, where he went as a member of the council of the League of Nations.

Tourist traffic brought Alberta a revenue of $30,000,000 last year, so Hon. R. G. Reid, provincial treasurer, states in his annual budget report.

The sale of Christmas seals last December brought to the aid of the fight against tuberculosis in Canada over $84,000.

Captain Geoffrey de Haviland, aircraft designer, making a flight to test a device intended to prevent a 'plane from crashing, crashed, but escaped serious injury.

During February 11 new branches of Canadian chartered banks were opened throughout the Dominion. Of these eight were located in the three prairie provinces, the Bank of Nova Scotia opened branches at Glaslyn and Sonningdale, Sask., while the Bank of Montreal and the Bank of Toronto opened new offices in The Pas mining district.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

Canadians May Sail For Antarctic

Reported That Two Canadian Citizens May Join Commander Byrd's Expedition

When Commander Richard E. Byrd sets sail for the Antarctic next fall, with his expedition culminating in an epoch-making flight across the South Pole, there is a possibility that he will be accompanied by two Canadians.

There is a possibility of Dr. L. D. Livingstone, F.R.G.S., of Ottawa, who is connected with the Northwest Territories branch of the interior department, and Inspector A. H. Joy, of the Royal Canadian Mounted Police, going with Commander Byrd, though definite arrangements have not been completed.

Both Dr. Livingstone and Inspector Joy have had vast experience in the Arctic regions.

A New Slip

Did you know that a fifteen-cent envelope of Diamond Dyes will duplicate any delicate tint that may be the vogue in dainty underwear? Keep your oldest lingerie, stockings too, in the shade of the hour. It's easy if you only use a true dye. Don't streak your nice things with synthetic tints.

Dye or tint anything; dresses, or drapes. You can work wonders with a few, inexpensive Diamond Dyes (true dyes). New colors right over the old. Any kind of material.

Diamond Dyes

Just Dip to TINT, or Boil to DYE

Western Canada Hog Industry

West Will Soon Pass the Fifty Per Cent Mark In Hog Production

Western Canada will soon pass the 50 per cent. mark in hog production in the Dominion, it was predicted at the annual convention of the Western Canada Livestock Union. Steadily the percentage of select bacon hogs has been increasing and since grading has been in effect the four Western Provinces have practically doubled the output of this class of hog. In 1927 there were 1,976,188 swine in Western Canada as against 865,097 in 1920.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar ,so that few children will refuse them. In some cases they cause vomiting through their action in an unsound stomach, but this is only a manifestation of their cleansing power, no indication that they are harmful. They can be thoroughly depended upon to clear worms from the system.

Demand For British Youths

Manitoba Farmers Anxious To Secure Services Of Youths From Great Britain

So many applications have been received from farmers in Manitoba to engage the services of youths who are being sent out from Great Britain under the Boy Immigration scheme, that the Provincial Government has requested the authorities to increase the number from 50 to 100. Hon. Albert Prefontaine, Minister of Agriculture, stated that 175 farmers have filed applications for boy help. It is expected that the first batch of youthful immigrants will reach Manitoba this month.

British Columbia Sheep

While British Columbia's sheep population increased by nearly 28,000 or 28 per cent. in 1927, it is pointed out that there is no danger of an overproduction since only 40 per cent. of the mutton and lamb consumed in the province is domestically raised.

Minard's Liniment—Invaluable in the Stable.

Children's Colds Best Treated Externally

THAT's why modern mothers prefer Vicks—it cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:

(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;

(2) It "draws out" the soreness like an old-fashioned poultice.

An Attractive New Frock

The smart daytime frock shown here will be found quite simple for the home modiste to fashion. The skirt has two plaits at each side of the front and is joined to the bodice, while the back is in one piece. There are tucks at the shoulders, long sleeves gathered to wristbands, or three-quarter length and having lace cuffs to correspond with the chic vestee, and a narrow belt fastening with a buckle in front completes this modish frock. No. 1587 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 3½ yards 39-inch, or 2⅝ yards 54-inch material; 2½ yards 3-inch lace for View A; 1½ yards for View B. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

JESUS THE SUFFERING MESSIAH

Golden Text: "If any man would come after Me, let him deny himself, and take up his cross, and follow Me."—Mark 8:34.

Lesson: Mark 8.27-9.1; 9.30-32; 10.32-34.

Devotional Reading: Isaiah 63.7-9.

Explanations and Comments

The Demands Of Discipleship, verses 34-37.—One great truth, Jesus is the Messiah, the disciples had learned; another great truth, the Messiah must suffer, they had been told, but, as after-events proved, they had not grasped; a third great truth they were now told—the followers of the Messiah must suffer and sacrifice likewise.

To the multitudes as well as to the disciples Jesus said, "If any man would come after me, let him deny himself, and take up his cross, and follow me." Denying oneself does not mean the giving up of this or that, but the giving up of self, the repudiating of all self-centered claims, the yielding of one's will to Christ's will. Not only must his Master endure the cross, but he himself, Peter learned, if he would be Christ's true follower, must be ready to suffer death, too. "A Christian is a Crucial," is Luther's comment.

"The beautiful thing is that this appeal of Christ was not futile. Instead of repelling men it drew them. He actually obtained the men whom he was hunting for, not by offering them worldly inducements, not by making such appeals as anybody but Christ would have made, but by addressing the sacrificial spirit in them, and making an appeal to their latent capacity for heroism. There is a wonderful tribute in Jesus' method to those characteristics in human nature which have never been destroyed, which can answer to the highest motives, which do not need to be bought by any low compensations, but which spring into full life when appealed to on the most heroic and unselfish plane. We know how, in consequence, this exultation in difficulties, this love of hardship, this scorn of ease, became the characteristic note of early Christianity. In the best summary description which Paul gives of Christian character and manhood, in the twelfth chapter of Romans, we find him speaking of 'rejoicing in hope; patient in tribulation.' And when he comes to write his conception of the character of the happy warrior, we find him setting this in the foreground, 'Endure hardship, as a good soldier of Jesus Christ'."—Robert E. Speer.

"For whosever would have his life shall lose it; and whosoever shall lose his life for my sake and the gospel's shall save it," Jesus continued. The word life and the pronoun it referring to life, are used in a twofold sense here. The sentence means: He whose only care is to save his natural life shall lose his spiritual life; and he who is willing to lose his natural life for My sake shall find his spiritual life.

The First Trouser Pocket

Before the time of the trousers pocket, man carried his valuables in a little bag of cloth tied about his waist. Often, however, a thief would slip up behind, slit the string with a knife and make off with the treasure. A thoughtful Frenchman, 300 years ago, sewed the bag in the lining of his garments, thereby instituting the first trousers pocket.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Refused Large Sum For Old Document

Offer Of American Did Not Tempt Corporation Of Bristol

The Bristol Corporation has refused the offer of $5,000 from an American millionaire for a page of a 17th century document which was recently discovered in a lumber-room of the corporation offices which was being cleared out to provide more space.

The document contained a complete list in clerkly handwriting, of the servants sent out under compulsory indentures to the plantations of the West Indies and Virginia between the years 1658 and 1662.

Twelve thousand names appear on the list and one of these is the family name of the American who was anxious to buy the page on which it appeared.

The list of names is being made into a book, and will be published in America shortly.

Fur Farming

Saskatchewan To Charge Annual Rental Of 25 Cents Per Acre For Three Years

An annual rental of 25 cents an acre for three years and $1.00 an acre for each succeeding year is to be charged for lands used for fur farming in Saskatchewan, according to Hon. C. M. Hamilton, Minister of Agriculture. The proposed rental charge is to cover the actual acreage of the land and water under lease. The cost of administering the lands is to be borne by the Provincial Government and it has authority to collect and retain the rentals. Altogether 92 applications have been received by the Department.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Alberta Sheep For Aleutian Islands

A shipment of sheep from Alberta to the Aleutian Islands, off the Alaskan coast, is being made by J. Nolte, a farmer, of the Stettler district. This shipment will consist of 98 sheep and two rams, and is going forward from Stettler to Seattle and then on. This is the first shipment of Alberta sheep to the Aleutians.

WAS SO NERVOUS and SHORT OF BREATH COULD HARDLY SLEEP

Mrs. Louise Raglin, Golden Lake, Ont., writes:—"For several years I was greatly troubled with my heart. I was so nervous and short of breath I could hardly sleep at night, and if I did sleep for a while I had bad dreams.

"I managed to keep at my work, somehow, until I began to have dizzy spells which got so bad I had to give up. I used many kinds of medicine, but found no help until I got a box of

MILBURN'S HEART AND NERVE PILLS

After the first box I found a great change, and after two boxes I was as well as I could be.

"I told my mother, who had choking sensations, about them and they helped her greatly."

ED. J. ROULEAU,
Editor and Publisher

The unceasing agitation carried on by individuals and organizations in Alberta and Ontario for low coal freight rates has now ended and those who devoted their energies in this campaign which was conducted throughout the length and breadth of the Dominion, can now take a three years breathing spell.

Undoubtedly the "Canadian Coal for Canadians" campaign was one of the best directed and most effective publicity drives ever conducted in Canada, as it is generally admitted that the incessant propaganda broadcasted each day and which reached practically every Canadian, was largely responsible for the victory gained.

We believe that the people of Alberta, and particularly those who are interested in the production of Canadian coal, should now prove to their brother Canadians in the East that they were sincere in their efforts to build up Canadian industry. The Industrial East has many Canadian products to offer the coal producers in the west and a policy of Canadian Pruducts First should be strictly adhered to in return for the support accorded the Canadian coal issues by thousands of patriotic citizens of this Dominion.—Drumheller Mail.

At the banquet given in Calgary last Saturday night by the members of C Division of the Alberta Provincial Police in honor of Inspector Brankly, who has resigned command of that division, Corporal R. H. Purdy spoke on behalf of the C division of the force.

ADVERTISE !

IT'S DONE—AT LAST

CHICAGO — Choirmaster Thomas Chapman was directing the Negro choir in Friendship Baptist church. Baritone Casey McGuriek Jones was singing off key. Without hesitation the deacon hauled off a blackjack and silenced the sour notes. Basso Washington McGavock didn't like that, so he pulled a telephone from the wall and knocked out the deacon. A moment later the remaining members of the choir joined the organist in "Throw Out the Life Line."

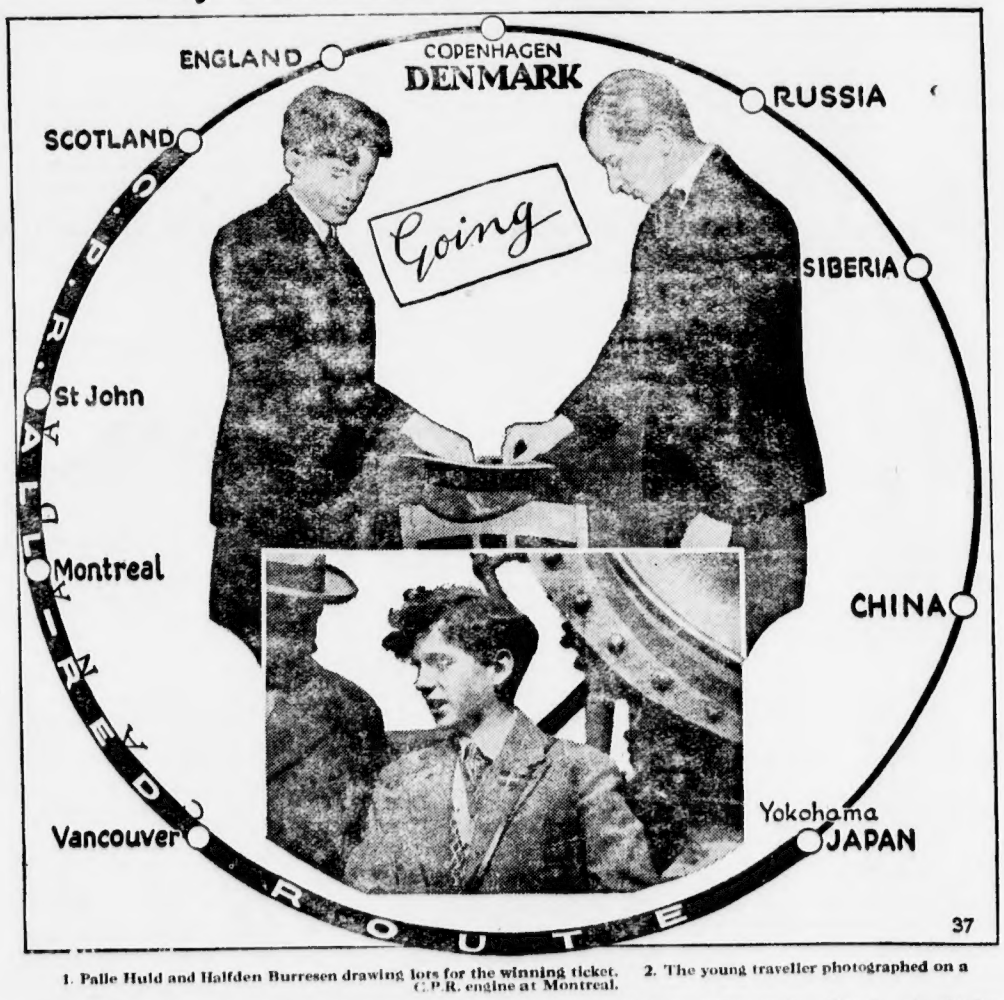
Boy Globe Circler Crosses Dominion



1. Palle Huld and Halfden Burresen drawing lots for the winning ticket. 2. The young traveller photographed on a C.P.R. engine at Montreal.

Travelling light with little more than a toothbrush and a pair of pyjamas, young Palle Huld, fifteen-year-old Danish globe encircler, passed through Montreal over Canadian Pacific lines, on Monday, March 12, having crossed the Atlantic from Greenock, Scotland, on the Canadian Pacific liner S.S. "Montcalm".

On the centenary of Jules Verne's birth, a leading Danish newspaper, the "Politiken", conceived the original idea of sending a representative around the world on the regular travelling schedule of 46 days, so as to make apparent the differences of travel of 1873 and 1928. To that end a new Phineas Fogg was required, and the editor of the newspaper decided that it should be a boy of between 15 and 18 years of age. A full page advertisement was placed in local papers, and young Huld was chosen. The same day as the advertisement appeared—at two o'clock, as appointed, the stairs, offices, and private rooms of the "Politiken" building was swarming with boys who wanted to go round the world. It was some scene, and it was soon seen that it was not even necessary to get a youth of eighteen years, there were boys of sixteen who would do quite as well, and finally the fifteen-year-old boys proved as capable as the others. A correspondent just returned from China and the revolution there, examined the boys one after the other. They all had a thorough examination, their permission from their parents in their hands they stammered out their wild desire to get the exciting chance—and finally five boys were selected. Out of the five two proved the best. They were Palle Huld and Halfden Burresen. They were both equally fitted for the journey, everything justifying their setting off. As no one liked, however, to rob the other of his chance a new idea was hit upon. They must draw lots. A hat was placed on the back of a chair, the lots thrown into it, they put down their hands—Palle Huld looked at the fascinating word: "Going"! He was the lucky one.

Who is he, then? A plucky young fellow with a boyish, dark blue flash in his eyes, red fascinating hair, blond as a Northern Viking and yet a slim schoolboy, 15 years old. He is not a bit afraid. He got permission from his manager to leave the business, where he is an apprentice, for two months, and after the lucky result, rushed to his mother: "Mother, do you know, I am to go round the world!"

He left Copenhagen on Thursday, the first of March, and he expected to be back, as he has promised, in 46 days.

Palle Huld sailed from Greenock, Scotland, on March 3, on the Canadian Pacific liner S.S. "Montcalm". He reached Montreal on Monday morning, March 12th, and left that evening for Vancouver, where he sailed for Yokohama on board the C. P. R. flagship the "Empress of Canada". Arrangements for his further trip to Korea, China, Soviet Russia and back to Copenhagen are in the hands of the Canadian Pacific Railway.

Where can you buy so much ' ' for such PRICES?

At their sensational new prices of $870 and upwards, Chrysler cars, with famous Chrysler quality and performance unchanged, become even greater value than ever before.

They offer outstanding values which result from a huge and constantly swelling public demand. Four great lines of cars—"52," "62," "72," and 112 h. p. Imperial "80"—supply every price need from $870 to $4685.

Inspection—better still, actual demonstration—will instantly convince you that in any Chrysler you buy performance, quality, style and value which you cannot equal in any other make costing hundreds of dollars more.

Just Dip to TINT, or Boil to DYE

Issuing Series Of Historic Postcards

British State Papers Will Be Photographed For This Purpose

To popularize history, the Public Record Office, in London, is about to issue a series of postcards made from photographs of some of the state papers contained in governmental archives. The subjects include: The original draft of the log of Nelson's flagship on the two days after the battle of Trafalgar; a signature of Shakespeare; Sir Philip Sidney's last letter; the indenture to Magna Charta; a page of the treaty violated by Germany in invading Belgium a picture of the two volumes of Doomsday Book.

ARE PALE PEOPLE WELL?

Some pale people are well, but not many. Pallor generally means thin blood. When, in addition, you are short of breath, and your heart palpitates after slight exercise and you perhaps show symptoms of indigestion and nervousness, there is no doubt about it. You are in an anaemic condition.

Dr. Williams' Pink Pills are the logical remedy for anaemia, for they begin at once to build up the thin blood, strengthen the nerves, increase the appetite and aid digestion. But do not wait too long. Thin blood is a stealthy and dangerous foe.

If you will send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., they will send you two little booklets, "Building Up the Blood," and "What to Eat and How to Eat," both of which will be found very useful in the home.

The Feeding Of Babies

From time immemorial it has been recognized that babies thrive best when breast-fed, and it is the ambition of every mother to nurse her baby. But since it frequently happens that this is not practicable for one reason or another, the young mother looks about most anxiously for that food which will best take the place of the natural food which is not obtainable. It is essential that the food used should be absolutely pure, that it should contain all the necessary elements of nourishment for the child, and finally that it should be easily digestible. For three generations Borden's Eagle Brand Condensed Milk has been the standby of mothers who have been unable to nurse their babies. It is a leading infants' food, more Eagle Brand being used than the combined total of all others. It measures up to the requirements of the infants perfectly, and nearly all babies thrive on it from the first feeding.

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it incomparable as a container for fine tea. You will never find that flat, stale taste in Red Rose Tea, because it is put up exclusively in dampproof aluminum packages.

MARCH 25

JESUS PROCLAIMS THE KINGDOM OF GOD

Golden Text: "And Jesus went about all the cities and the villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of disease and all manner of sickness."—Matthew 9.35.

Devotional Reading: Malachie 3. 1-6.

Review By Means Of Allusions

I do not expect the Union to be dissolved, I do not expect the house to fall, but I do expect it will cease to be divided.—Lincoln.

I am confident that should every foreigner be forced to withdraw, the grain of mustard seed will grow. Churches that live will have such vitality that the good news will be spread.—A Chinese Missionary.

One touch upon His garment's fringe
Still heals the hurt of bitter years;
Before him yet the demons cringe.
He gives the wine of joy for tears.
—Margaret Sangster.

This characterization comes perilously near to being akin to the sin of the scribes of old when they attributed that which was good to the action of the spirit of evil. A more careful analysis of the social aspirations now becoming vocal in all lands would indicate that a strong man has entered the house and that he is destined to bind the forces of evil which have been working injury to the weak. —Charles Reynolds Brown.

"Whatever the fever, his touch can heal it."

New Weather Bureau

Station At St. Hubert Aerodrome Has Modern Equipment

The Meteorological Service of Canada has just established a new weather bureau at St. Hubert Aerodrome, near Montreal, under the direction of the Naval Service in connection with the trans-Atlantic air service which is expected to be put into operation in the coming summer. The station is fully equipped with the modern meteorological apparatus and is under the direction of Leo R. Charron, of the Royal Canadian Air Force.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Eclectric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Good Yields In Irrigated District

An average of 33.7 bushels of wheat per acre was produced on lands in the Lethbridge (Alberta), Northern Irrigation District in 1927, the total being 1,997,785 bushels on 60,161 acres. The total value of all production in the district, including grain, fodder crops, dairying and poultry, is $2,988,295, as compared with $1,528,000 in 1926. The increase in production in three years has been over 500 per cent.

Are You Nervous? Sleepless?

St. Catharines, Ont.—"I was in such a nervous and rundown state of health that I could hardly get around to do my work. I could not sleep and the least noise or excitement would completely upset me and throw me into a nervous spell. I was advised to take Dr. Pierce's Favorite Prescription and I was soon well and strong and have never had another spell of nervousness since.

Mrs. Ada Taylor

"I always keep a bottle of Dr. Pierce's Pleasant Pellets in my medicine chest; they are the only medicine I have ever taken that would regulate the liver and relieve constipation without causing distress."—Mrs. Ada Taylor, 46 Wiley St.

Send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., if you desire a trial pkg. Favorite Prescription tablets.

Experiments have demonstrated that is possible to grow certain hardy fruits on the prairies. If there is anything in a name, the Snow and Northern Spy apples should be frostproof.

Rub It In For Lame Back. — A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out, and there are ample grounds for saying that it is an excellent article.

The electric unit known as the volt takes its name from Alexander Volta, who made the first voltaic battery.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

MAIN BUDGET MOTION ADOPTED BY 24 MAJORITY

Ottawa.—By a majority of 24, the House adopted the main budget motion. The vote was: For, 116; Against, 92; majority for, 24.

The majority consisted of Liberals, Liberal-Progressives and the Independents sitting on the government side. From the left of the speaker, L. H. Jelliff (U.F.A., Lethbridge) was the only member to vote for the budget. Conservatives, other members of the U.F.A.-Progressive group and Labor members voted against the budget. There were loud cheers from both sides of the House as the result was announced. Speaker Lemieux left the chair and the House resolved into committee on ways and means to consider the budget resolutions one by one. But proceedings in committee were brief. There was a reporting of technical progress and the House proceeded to other business.

The House met in expectant mood. The intervention of Henri Bourassa with its sudden termination of the vote on the main budget motion had left members wondering what the day would bring forth.

Immediately the main motion was submitted Mr. Bourassa rose to speak. But he had said only a few words when Hon. R. B. Bennett, Conservative leader, was on his feet with the objection that Mr. Bourassa has already spoken and was not entitled to speak again. There was some discussion pro and con and the speaker ruled against Mr. Bennett. The speaker held that members with the exception of Mr. Cahan had not spoken on the main motion, and were therefore entitled to speak.

Mr. Bennett appealed the ruling, which was sustained by a majority of 41. Liberals, with the exception of six French-speaking members from Quebec, voted for the ruling as did Liberal-Progressives, Progressives, U.F.A. and Labor members. With them also voted C. H. Cahan, Conservative of St. Lawrence-St. George. All other Conservatives voted against.

When the result was announced, Mr. Bourassa again rose to continue his speech. He was interrupted by booing from the Conservative side. As he endeavored to continue there was a sort of catcall from the opposition lobby.

"Order, order," called the Speaker. "I will ask the sergeant-at-arms to exercise the rights of the House," he said.

The sergeant-at-arms went into the lobby. The noise ceased and Mr. Bourassa proceeded.

Where Women Cannot Vote

Defeat Effort to Give Married Women Right to Vote in Montreal Municipal Elections

Quebec.—A final effort to give married women separate as to property the municipal vote in Montreal was defeated in the Quebec legislative council on third reading of the Montreal bill, the vote being 12 to 9.

Hon. J. L. Perron, minister of roads and Government leader in the Upper House, remarked in the course of the debate that there are not 15 women in the provnice of Quebec who favor feminine suffrage.

Destroyers For Canada

Ottawa.—The destroyers Champlain and Vancouver, which are being transferred from Great Britain to the Canadian naval service, will sail shortly from Portsmouth. After stopping at various points en route, the Vancouver will reach Esquimalt on June 3 and the Champlain will arrive at Halifax, May 17.

Condition Is Improved

Ottawa.—The condition of General A. D. McRae, Vancouver member of parliament, who suffered a fracture of the skull when he slipped and fell on the icy pavement when leaving the parliament buildings, was reported as being considerably improved.

B.C. Legislature Prorogued

Victoria, B.C.—The British Columbia legislature prorogued March 14th with customary ceremonies.

California Disaster

Death Toll Placed at 264 in Territory Laid Waste by Flood

Santa Paula, Cal. — Rehabilitation work is under way in San Francisquito Canyon and the Santa Clara Valley, which were laid waste by the breaking of St. Francis dam with a known death toll of 264.

While searching parties continued to bring in additional bodies recovered from the silt and slime left in the wake of the flood, telephone and telegraph repair gangs, steam shovels, wrecking and bridge crews took the field in the first steps to restore the stricken area to its former beauty and industry.

Meanwhile a committee was organizing here to formulate a general rehabilitation programme. Speakers charged that the city of Los Angeles, which built the dam as part of its water system, was responsible for the disaster.

The toll in life and property, estimated from official figures and the surveys of careful observers, stood as follows:

264 lives lost.

St. Fancis dam demolished.

Los Angeles municipal power house below dam demolished.

500 homes destroyed or greatly damaged.

20 miles of citrus orchard land buried under many feet of mud and silt.

10 important bridges destroyed.

State and county highways washed out at numerous points.

Telegraph and telephone lines disrupted over an area connecting half a dozen towns and a dozen smaller communities.

1,500 persons virtually homeless and many of these, temporarily at least, destitute.

Livestock killed and drowned, unestimated total.

The aggregate property loss cannot be determined at present.

Officials declared that it would require weeks to fix the figures which might be found anywhere between $7,000,000 and $30,000,000.

Tourists Injured In Fire

Sleeping Car on Train From Luxor Completely Destroyed

Cairo, Egypt.—Passengers of a crowded de luxe train from Luxor narrowly escaped death when fire broke out in a first class coach and spread to an adjoining sleeping car.

In their flight ,some of the passengers, mostly tourists, received cut hands, barked shins, sprained ankles and bruises as they escaped through windows, the only available exit. There was no time to save anything or to don suitable garments.

Baggage and valuables were abandoned, a prey to the flames. Everything was destroyed in the two coaches. The losses are believed considerable.

George Eastman, Rochester, N.Y., millionaire, and his hunting party, were aboard the train, and all the films taken on their trip were destroyed.

The Eastman films included those of wild animal life which he had taken in Central Africa.

Butter From Antipodes

Ottawa.—Between April 1, 1927, and January, 1928, 33,872 pounds of Australia butter entered Canada for consumption, according to an answer given in the House of Commons. It was also stated that 4,900,000 pounds of butter entered Canada from New Zealand during the calendar year 1927, and 895,000 pounds of mutton entered Canada from Australia during the same period.

Beer by the Glass

Winnipeg.—A little more than twelve years ago the old saloon bar, with its familiar brass foot-rail, was discarded in Manitoba. Today beer parlors with fine furnishings and restful appearance opened in Winnipeg, and a "rushing" business was reported from a score of hotels which started serving beer by the glass under the newly adopted liquor control legislation.

Bodies of Slide Victims

Vancouver, B.C.—The bodies of three men buried in a landslide at the entrance of a Canadian National Railway tunnel near Savona, some 200 miles east of here, have been recovered. The men are Andy Anderson, W. Gustha and George Parkes.

B. C. Minister Passes

Hon. William Sloan, British Columbia's Minister of Mines, and former Provincial Secretary, who died recently at Victoria.

Chosen Conservative Leader

Dr. J. T. M. Anderson Selected as Leader of Conservative Party in Saskatchewan

Saskatoon.—Dr. J. T. M. Anderson, member of the Saskatchewan Legislature for Saskatoon City, was selected by three hundred delegates at the Conservative convention here as the provincial leader of the party.

When the moment came for receiving nominations, the following names were submitted to the delegates: M. A. MacPherson, K.C., M.L.A., Regina; Dr. J. T. M. Anderson, M.L.A., Saskatoon; Howard McConnell, M.L.A., Saskatoon; J. A. Haagerman, Unity, and J. F. Diefenbaker, Prince Albert.

Under the procedure decided upon, a special committee consisting of George Bennett, Wolseley; R. E. Alexander, Gull Lake, and W. Ramsay, Bladworth, immediately met the nominees to ascertain whether or not they would accept nomination. The report brought back by this committee stated that it was the unanimous decision of the candidates that Dr. Anderson should be selected and consequently the others withdrew their names from nomination.

Hinkler Receives Cheque

Sydney, N.S.W.—On his arrival at Canberra, Bert Hinkler, Australia's new hero-flier, was welcomed by the Commonwealth government and presented with a cheque for 2,000 pounds sterling by Premier Bruce in recognition of his feat in flying from England to Australia in fifteen days.

Cost of Fishing Probe

Ottawa.—The total cost of the Royal Fisheries commission established to investigate the problems of the fishermen on the Atlantic coast amounted to $51,845.56 up to January 31, 1928. This was divided between $26,220.11 for fees and $25,625.45 expenses.

Officials Will Be Examined

To Give Evidence at Future Sittings of Immigration Committee.

Ottawa.—Officials in charge of immigration and colonization for the Canadian Railways will be summoned before the parliamentary committee investigating the department of immigration.

W. J. Egan, Deputy Minister of Immigration, was again on the stand. He said the department had checked to determine if all farm laborers brought in under the railway agreement actually went on the farm and had discovered that such was not the case in some instances.

Mr. Egan said he thought railways which brought in the bulk of immigrants were fulfilling the spirit of their agreement.

Every effort had been made by the department to induce British farm laborers to come to Canada and despite the lower fare in effect to Australia there were more people coming to Canada from Britain than went to all other outlying parts of the Empire.

Answering a question by George Spotten, Mr. Egan declared there had been newspaper propaganda against Great Britain during 1922 and 1923, arising partly from nonpayment of interest on Grand Trunk securities. This affected immigration, but the propaganda had later been counteracted.

Usually immigrants were not stripped for examination, he said, and Dr. McGibbon objected that if this was so the medical examination was a farce. It would not be known if a man had tuberculosis or heart trouble without stripping him.

For Union With Canada

Senator Would Welcome Newfoundland as a Province of this Dominion

Ottawa. — Favorable attitude by Canada towards any proposal which Newfoundland might make to join the Dominion is advocated by Senator C. E. Tanner, Halifax. Senator Tanner has given notice of a motion for discussion in the Senate advocating:

"That in the opinion of this House, if proposal should be made on behalf of the people of Newfoundland for union with the Dominion of Canada the people of Canada would view such proposal with favor, and would welcome Newfoundland as a province of this Dominion."

Is Back to Par

New York.—The Canadian dollar climbed back to par on the New York money market after being at a slight discount for more than three months. The Canadian dollar was at a slight premium on par from August 22 to December 2, 1926, when it dropped to a discount, which has since ranged from 1-32 to 13-64 of one per cent.

Banff Carnival Triumphs

1. Miss Emilie Mason, retiring queen of carnival, receives delegation of Stoney Mountain Indians.
2. Mark Pisette, well known Stoney Mountain Indian, adjusts the new Queen Kate Harrison's skis prior to the skijoring race.

After one of the most successful Banff Carnivals on record proceedings came to a close on Saturday, February 11, with the crowning of Miss Kate Harrison, of Vancouver, B.C., as the new queen. Miss Harrison will hold office until the close of next year's carnival. One of the most picturesque happenings of the eight days festivities was the receiving of a band of Stoney Mountain Indians by the retiring queen, Miss Emilie Mason, of Calgary, who received a tremendous ovation as she vacated her throne of office.

Visitors from all over the United States and Canada attended and vied with each other in every variety of winter sorts. The Winnipeg Skating Club covered itself with glory when it annexed the Elkhead, emblematic of the championship while that well known musher, Ike Mills, added further to his laurels by winning the Dog Derby and the Strongheart trophy in remarkable time. Ike finished the last 30 miles in the astounding time of two hours and forty minutes.

WOULD GIVE AID TO CANADIANS SETTLING IN WEST

Ottawa. A resolution proposing that citizens of Canada desirous of settling on western land should receive from the Government the same assistance and favorable treatment as the citizens of Europe was proposed in the House of Commons by C. L. Boulanger (Liberal, Belle Chasse).

The reasonableness of the proposal should appeal to all Canadians, Mr. Boulanger said. It would mean more shoulders to bear the burden of debt and would help to keep Canadians at home on the land. Canadians, the descendants of the Loyalists and those of French origin had traditions which made them the best type of settlers.

Hon. J. W. Edwards (Conservative, Frontenac) declared that the resolution should be extended in order to encourage westerners to come east and settle in the central provinces. He could not see the force of the resolution until the Government adopted a policy that would keep the youth of Canada on the land.

H. E. Lavigueur (Liberal, Quebec-Montmorency) declared that Hon. Mr. Edwards should be joining hand to hand with Mr. Boulanger in the matter of this resolution, rather than indulging in "whispers of death."

Peter McGibbon (Conservative, Muskoka) declared that what was wanted in Canada was work. He could not understand why the minister of immigration gave greater facilities and encouragement to immigrants from Europe when Canadians were leaving this country daily. He suggested the establishment of fur farms in Northern Ontario and Quebec.

Believes In Northern Route

Capt. Bernier Has Great Faith in Future of H. B. Railway

Ottawa.—Captain J. E. Bernier, famed Canadian navigator and Arctic explorer, believes an unprecedented period of prosperity will be Canada's fortune once the Hudson's Bay Railway is opened, thereby providing an economic outlet to the Atlantic. He expressed himself thus when he arrived in the capital.

Captain Bernier said that with the opening of the new route great shiploads of cattle and grain would be facilitated in their voyage to Europe, and that Canada would then compete more capably with the United States in the trading world. He said, however, that the ships used for this purpose would have to be built with sufficient strength to withstand ice pressure ,and that their mariners would require a full and accurate knowledge of existing conditions, supplemented with weather reports from coast stations.

Find Body of Murdered Man

Charred Bones of Victim Discovered On Trail Island

Vancouver, B.C. Bones of a man who had apparently been stunned by a blow on the back of the head and then killed, and the remains burned in a cleverly concealed natural furnace have been found on the southeast corner of Trail Island, about 30 miles north of Vancouver, it has been reported to provincial police.

The district is popular with summer campers. Indications were that the crime was committed within recent years.

A deep hole between boulders had been selected just above high water mark for the burning in a concealed spot that could not be seen by campers on the mainland. The case is being investigated.

Bill Given Third Reading

Winnipeg.—The Manitoba Old Age Pensions bill has passed its third reading in the legislature. A sum of $500,000 will be required to finance the measure during the first year, and this will be raised by means of a property tax. The bill will be effective only after proclamation by the lieutenant-governor, and probably will not become operative until late in the summer.

Sweet Clover a Good Friend But a Bad Master And Must Be Kept Under Control

Like fire, sweet clover is a good friend but a bad master. After a hectic career of about 15 years it has risen from a place of universal condemnation as a dangerous weed, to one of the most popular crops in the country with many men, on sandy land particularly, making a fortune out of its seed. Even at ten dollars and more a bushel it was planted widely all over Eastern Canada and made much headway in the West. Then a few years after the war the defects of sweet clover began to show up and it sank in popular esteem until today the markets are loaded with seed and farmers cannot get more than two dollars a bushel for it.

Go into any of the five Dominion Government Seed Laboratories, scattered across the Dominion, and you will find that sweet clover pollutes most samples of other clover and alfalfa. Seedsmen will tell you that scores of good red clover, alsike, and alfalfa seed producing districts have been ruined by this weed, because it is a weed when growing with other crops, which comes up with the other clover, goes to seed at the same time, and because the seed of sweet clover is about the same size and weight as that of the others it is very difficult and sometimes impossible to separate it. Moreover, although once widely boomed as a hay crop, it is now generally admitted that red clover or alfalfa is a much better plant for this use.

But again, like fire, sweet clover has a very real place in Canadian agriculture, if it is handled properly. At the Government experimental farms there is no trouble with sweet clover, because it is kept under control. Even in seed producing districts it can be grown, though the big seed buyers warn growers against the risk. As fertilizer, silage, summer pasture and weed smotherer, sweet clover has a very real place, and on account of its qualities in these respects, it will probably always be grown in Canada, although no one expects to see big prices for seed again. There is no market for sweet clover in Europe and being a big yielder of seed and so widely planted both here and in United States, there is no possible chance of a recurrence of the boom period, and for the sake of the good qualities of the plant, it is well that these days do not recur. When seed prices for it were soaring the crop was planted everywhere before it was understood and the reaction which followed the appearance of its defects more than offset the advantage of its recent popularity.

But the secret of growing sweet clover is to prevent it from going to seed. Too much emphasis cannot be laid on this point. It must be sown early and cut before it commences to go to seed. If used for pasture it must be kept grazed closely or the stock will turn to something else and the clover will go to seed coming up in other crops later on as a weed. It must be scarified before sowing so that every seed will germinate or else some of the harder seeds will lie over one, two or even more seasons germinating later and polluting the crop coming on then. In special seed growing sections, such as Peel County, where alfalfa is a major crop, or in the Elgin or Maripose alsike districts in Ontario, or in the Brooks alfalfa area of Alberta, seed experts advise growers not to touch sweet clover at all. The risk is too great of it getting mixed with the alfalfa, alsike, or other clover and spoiling the quality of the crops produced. If these growers could band together and prohibit sweet clover in these specialized sections altogether, it would be added protection. At all events they should insist that no threshers which have been operating in districts where sweet clover is grown should touch their own crops as the machines will carry sweet clover seeds and mix some with the seed of alfalfa and alsike. The seed may also be spread through manure or straw from farms growing this crop.

Alfalfa, red clover, timothy and mixtures of the three are unrivalled for hay and the alfalfa and the red clover will build up the land. The seed of all three, if grown from good stock on a clean field, will always be worth money, but where handled properly sweet clover has a place as a fertilizer, silage or a weed smothering crop.

Holds World's Record

Hen Owned By University Of B.C. Is Sustaining Her Reputation

There is a hen in British Columbia which seems to be the prototype of that well-known fowl that "laid the golden eggs." "Maizie" is the name of the famous White Leghorn, owned by the University of British Columbia, which, because of her egg-laying proclivities, has had greatness thrust upon her. This remarkable hen has already a world's record to her credit, having laid 351 eggs in one year, and she has more than sustained her reputation in the new year. According to the Brantford Expositor, "Maizie's" production brought to the university last year cash proceeds of $2,225. Included in this was $500 each for two cockerels; another cockerel sold for $300, and seventeen hatching eggs brought $425 to the coffers of the university. It can hardly be wondered that this Western institution has refused all offers to part with "Maizie," although high cash offers have been made. Apart from the value of this hen as a revenue producer, it is an advertisement for the university that cannot be measured in dollars and cents. It has probably done more to make the University of British Columbia known throughout the American Continent than any other single factor since the institution was founded.

Shipping Cattle To China

Market For Dairy Stock From B.C. Is Still Good

British Columbia is shipping more dairy cattle to China and, despite political uncertainty there, the market for good stock continues in a healthy condition, according to Dr. A. Knight, provincial livestock commissioner.

A shipment of 23 pure-bred and grade Jersey and Guernsey bulls and cows recently went out to Hong Kong for the Farm, Dairy, Ice and Cold Storage Company there and further shipments will be sent during the spring.

Just a Bit Mixed

Uncle Ezra—"How did your automoble accident happen?"

Uncle Ezra—"Well, you see, there's one thing you keep your eye on, and another one you keep your foot on, and another you keep your hand on, and I guess I got my anatomy in the wrong place."

Canada's Copper Industry

Dominion Rapidly Climbing To Third Place In Production

That within the next 10 years Canada will become the world's third largest producer of copper, being then surpassed in this field only by the U.S. and Chile, was the prediction made by Sydney J. Cook, chief of the mining, metallurgical and chemical branch, Dominion Bureau of Statistics, Ottawa, during an address on Canada's future in copper, given at the annual general meeting of the Canadian Institute of Mining and Metallurgy in Quebec.

Mr. Cooke said that although Canada now produces only about five per cent. of the world's output of copper, an enormous increase in production will be possible through the development of the newer fields that are just now coming to the front, such as the Rouyn District in Quebec, the Frood mine area near Sudbury, in Ontario, and the several copper properties in Manitoba.

The speaker foresaw no diminution in the per capita consumption of copper, but rather the probability of a gradual increase in the use of this metal.

Buy At Home—You Sell There

Patronize Your Local Merchant and Build Up Your Own Community

Patronize your local merchant. Any profit he may make through your trade goes toward the betterment of his home town—and yours. His home beautifies your town. His taxes help to keep yours down. His contributions to local charities prove that his interests lie where yours do.

His advertisements in the local paper enable ye editor to build another home, donate still further to local needs, and supply better material for your reading hours.

Your local merchant buys your produce. He sells it to your friends. If you sell at home and buy elsewhere, home will soon become an undesirable place to live.

The gold in the distant cities may attract, but long ago it was learned that "all is not gold that glitters."

Almond Industry Profitable

Many Varities Are Cultivated On Island Of Majorca

Almonds have a prominent place on the table, but few people realize the great trouble taken in their cultivation. They are the most important crop of the island of Majorca, where many varieties are cultivated, and the industry is so prosperous that as old olive trees die they are replaced by almonds.

When the almonds are almost ripe they are knocked off the branches by long bamboo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by hand or machinery and the kernels extracted.

Modern banking originated in Italy.

Naval Agreement Between Britain and U. S. Would Be Big Step Towards World Peace

Great Britain and the United States eventually will be in accord on the naval armament question and when that time comes a big step will have been taken in insuring world peace, John B. Atkins, political editor of the London Spectator, told members of the English-speaking union in Chicago.

"The failure of the Geneva conference was a blow to the hopes and aims of the English people, but it is only a question of time until the two nations are able to see eye to eye on this question," Atkins said.

"It is not realized in this country how necessary it is for Britain to reduce her offensive arms, or how much in earnest Englishmen are on the disarmament question. Since the war England's industries have been on the verge of disintegration. The thermometer of our prosperity, our northern heavy industries, coal, steel and textile, has been very low."

The dispute on the light cruiser question, to which Atkins attributed the Geneva break, he traced to the geographical differences between the British Empire and the United States. Britain held out for a larger number of small cruisers because of the complexity of trade routes she must protect.

"We recognize that commercial prosperity which once was Britain's has passed to the United States," he said. "Because of this we realize that entering into a naval building competition with you would be to court disaster. That is why I am convinced that the light cruiser problem will not long remain a point of difference.

"In the next war the battle lines will be the centres of production, instead of ditches in muddy fields. The civilization of the countries involved will receive crushing blows."

Farmers Account Book

A Useful Little Account Book For Farmers

Farm surveys have shown that very few farmers follow a systematic method of farm accounting. This may, in the past, have been due to a lack of suitable simple forms or account books for the purpose. There are today a number of simple books issued which are a great help to the farmer in this important matter. Farming is a business, and if it does not pay the farmer should know why it does not pay. Some record of receipts and expenses, together with an inventory (a list with values of livestock, feed, implements, etc., on hand), taken at the beginning and the end of the farmers' year, must be kept if he is to find out why it doesn't pay. Keep a record of each department of your farm business. Find out how much you are making from each, and if any are not paying.

A simple and yet very useful little account book for farmers has been issued by the Dominion experimental farms. This may be procured from the publications branch, department of agriculture, Ottawa, for the nominal charge of ten cents. This little book while simple, is a great step in advance of keeping no accounts whatever. Now is a good time to take an inventory and start keeping accounts.

Believes New Wheat Is Rust Resistant

Discovery By Dr. Seagar Wheeler Suitable For Milling Purposes

A new variety of wheat which he thinks will be substantially rust resistant and at the same time be suitable for milling purposes has been discovered by Dr. Seager Wheeler of Rosthern, Sask. Dr. Wheeler made the announcement while speaking on the danger of rust in Western Canada, at the annual banquet of the Rosthern Board of Trade. Dr. Wheeler announced that the new wheat is a cross breed from Kota. He has been growing wheat for the past 40 years and for the last 20 years has endeavored to obtain a rust resistant variety. He states that this Kota cross breed will be most likely what was desired by the Western farmer. Experiments are being made with this wheat at Ottawa, Saskatoon ,and in Manitoba and Dakota.

Winnipeg Newspaper Union Fashion

Attractive Bandeau and Bloomers

Extremely well-fitting are the attractive bandeau and bloomers pictured here for ladies and misses. The bandeau has attached shoulder straps and is gathered at the centre-front and closed at centre-back. The bloomers have elastic inserted through hems at the lower edges, and the top is gathered into shaped yokes. No. 1714 is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 38 requires 2⅛ yards 36-inch material for the bandeau and bloomers, or 1¾ yards 36-inch material for the bloomers and ⅜ yard 36-inch material for separate bandeau. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Glimpses of Jasper's Winter Carnival

1.—Left to right: Carnival Queen and her Court.—Page, Miss Grace Bolli; Lady in Waiting, Miss Dora Joberns, Edmonton; Queen, Miss Grace Poole; Last year's Queen, Miss Margaret Buckham; Page, Miss Gladys Butler.

2.—Dr. William Egbert, Lieutenant-Governor of Alberta, and W. A. Brown, Canadian National superintendent of Edmonton, curling on Lac Beauvert.

3.—Queen of the Carnival congratulating P. Gotaas, Camrose, winner of the 28-mile cross-country ski race.

4.—Miss Marjorie Banning, of California, doing stunts on Lac Beauvert in a bathing suit.

WILL CENTRALIZE RESEARCH WORK AT THE CAPITAL

Ottawa.—Centralized industrial research, made possible by the decision of the Dominion Government to establish national research laboratories at Ottawa, will be of distinct benefit to Canadian universities, as well as to Canadian industries.

Co-operating with the National Research Council, the universities have for the past ten years voluntarily given over their laboratories and their staffs to investigations outside the strict limits of academic research. The step finally decided upon at Ottawa, on the insistent representation of the National Research Council, means that these facilities will once more be liberated for the service of pure science.

The council will continue the bursaries and scholarships with which, since its creation it has stimulated the training of research specialists, to supplant foreign-trained experts in Canadian industries. The fitting of scientists for research work is of the utmost importance to Canada, whose industries are still in an infant stage of development, it is pointed out.

The National Research Council has awarded 44 scholarships, as the result of which 155 Canadians complete their training in their own country, almost all of them finding employment in Canada. Before the inauguration of these awards it was necessary for the Canadian student to go abroad to complete his training, with the result that he usually found employment abroad and was lost to his own country. American institutions of learning give 2,000 such scholarships annually, the majority of which are open to Canadian students.

One of the great needs of today is an increased number of such scholarships, so that Canadian universities may maintain graduate schools for training in science and research of a sufficiently high standard to eliminate the necessity of the most brilliant graduate going abroad to complete his education and possibly taking his valuable knowledge permanently out of the Docinion. Such graduate schools will provide the technicians required by the universities and the government service, as well as the national industries.

Heads Research Council

Sir Joseph Flavelle Will Be Chairman Of Research Council In Ontario

Toronto.—Sir Joseph Flavelle, prominent Toronto capitalist and philanthropist, will be chairman of the industrial research council for the creation of which legislation is now before the legislature, Premier Ferguson anounced in the House.

A research council composed of University men and men interested in the various industries, including agriculture, is to be established. Persons interested in the work may contribute money to the board, and for each dollar contributed by private individuals the Government will contribute another dollar. The plan is to raise a sum of $2,000,000 in five years, the Government paying $200,000 a year, provided private contributions are of equal proportion.

Unity Of Empire

Canberra, Australia. — Questioned in the House of Representatives regarding the recent statement of Premier J. B. M. Hertzog, of the Union of South Africa, to the event Great Britain is involved in a war, Premier Stanley E. Bruce declared that when the King was at war all parts of the Empire were involved, although each parliament could decide the extent of any active participation.

Alberta Legislature Prorogued

Edmonton.—After a session which lasted seven weeks, the Alberta Legislature was prorogued by Lieut.-Gov. Egbert. Before prorogation His Honor assented to 81 bills. The final sitting was devoted to a debate on the railway situation — which Premier Brownlee had previously announced may be made the object of a special midsummer session—and the clearing order paper of three or four bills which were given final reading.

W. N. U. 1726

Advocates System Of Organized Marketing

Conditions Of Poultry Business Unsatisfactory Says Cowichan Man

Victoria, B.C.—Hen No. 6 which broke all egg production records a year ago, advertised British Columbia poultry to the world and brought thousands of dollars in orders to the University of British Columbia pens, but she has merely helped to complicate the market situation.

That is the view of Captain A. B. Mathews, of the Cowichan Creamery Association, one of the largest co-operative dairy and poultry concerns in Western Canada.

"The condition of the poultry business is unsatisfactory," reported Captain Matthews. "Not only has the number of birds increased very rapidly, but egg production per bird is also increasing. Hen No. 6 may be the eighth wonder of the world, but unless the boosting of excessive production is supplemented by some intelligent system of organized marketing, the 300-egg hen may be a curse to the industry rather than a blessing."

It was reported at the meeting that companies shipping eggs to the eastern markets had lost approximately $40,000 during the last few months owing to the market conditions.

Start For North Pole

Advance Guard For Wilkin's Expedition Begins Long Trip

Rome.—The advance guard and other equipment for the aerial expedition over the North Pole is headed for Arctic regions.

The ice breaker, City of Milan, which will be used as a mobile base by General Umberto Nobile for his dirigible flights over the Polar regions, sailed from Spezia for Kings Bay, Spitzbergen. The ship is outfitted with the latest scientific instruments and carries a wireles receiving and transmitting set.

The ship is expected to reach its Northern goal before the end of April and by that time the Polar summer daylight will have begun. Norwegian workmen are to refit the hangar at Spitzbergen, used by the dirigible Norge on its trans-Polar flight in 1926, for the Italia, General Nobile's present craft.

The Italia successfully completed a test flight of 22 hours with a full load of supplies and a complement of 21 men under General Nobile. It is now at the Baggio airport, near Milan, and is expected to start Northward about the middle of April.

Besides hoping to discover the fabled frozen continent of the North, Wilkins intends to find suitable locations for weather observing stations.

Bicycle Teams Sold Race

Managers and Trainers Barred From Future Events In Germany

Berlin. — Berlin's 26-day bicycle race, which ended March 15, has had a sensational sequel in the revelation that the three leading teams were found guilty by the League of German Bicycle Riders of selling out to a betting ring less than six hours before the race ended.

Several managers and trainers of the teams implicated in the scandal have been definitely barred from future participation in German events.

Plague In Prison Camp

Sydney, N.S.W. — Following the murder of two white officials in the Solomon Islands last October, 170 tribesmen were rounded up and corralled in a hastily-constructed camp. Word has now been received here that dysentery has broken out in the camp. Out of 40 natives affected seven have died. The magistrate to try the prisoners is now on the way from Fiji.

Will Discuss Thanksgiving Date

Ottawa.—Armistice and Thanksgiving Day should be celebrated on the same day—November 11. This is the practice advocated by K. J. Ladner, Conservative, Vancouver South, in a resolution placed on the order paper of the House. The suggestion will be discussed shortly in Parliament.

Date trees in the world total 90,000,000, according to a recent estimate.

INJURED BY FALL

Major-Gen. A. D. McRae, M.P., who suffered a fracture of the skull, caused by slipping on the ice on Parliament Hill, Ottawa.

Flies Over London

Afghan Monarch Views World's Metropolis From the Air

London.—The first royal aeroplane tour over London on record was successfully carried out.

King Amanullah, of Afghanistan, flew in a large Imperial Airways liner over the city starting from Croydon and returning there after a swing through the air taking in the Crystal Palace, the Tower Bridge, St. Paul's, Westminster Abbey, Buckingham Palace, Chelsea and the southwest London District.

The Afghan monarch appeared intensely interested in the excursion and moved about in the plane viewing the various scenes through binoculars.

Given Free Hand

Alberta Cabinet Can Sell Government-Owned Railways

Edmonton.—Premier Brownlee and the cabinet were given a free hand in future negotiations to sell the provincial government-owned railways, at a session of the Alberta legislature. Premier Brownlee will probably leave for the East at an early date.

The premier presented figures showing a vast improvement attained in revenue by the A. and G.W. and the E.D. and B.C. lines for the first two months of 1928, over the corresponding period of 1927.

It is expected a summer session will be called if the railway situation is to be considered.

Smuggling Conspiracy

London. — Reports that Scotland Yard has unearthed a mysterious arms smuggling conspiracy seeking to provide arms for Irish republicans are published in the Evening Standard. Scotland Yard believes the weapons were smuggled into London for the purpose of arming companies of an Irish republican army, says the newspaper, adding that detectives have estimated that there are 100 Irish smugglers in Londno engaged in an illicit trade in revolvers and automatic pistols.

Manitoba Flight Abandoned

Winnipeg.—Word was received here indicating that the proposed test flight to Northern Manitoba of Commander Richard E. Byrd's South Pole 'plane has been definitely abandoned.

British Medical Men Coming To Canada

Arrangements Being Made For Convention At Winnipeg In 1930

Toronto, Ont.—In connection with the proposed meeting of the British Medical Association in Winnipeg, Man., in 1930, a program is already being arranged whereby the visiting medical men will be enabled to see as much of the Dominion as possible before they return to Great Britajn. Dr. T. C. Routley, Toronto, secretary of the Canadian Medical Association, is sailing at the end of this month for the Old Country to arrange details of the 1930 meeting of the British Medical Association in Winnipeg, which is expected to be the greatest gathering of doctors ever held in the Empire.

This will be the third meeting of the British Medical Association outside of the British Isles, both of the previous meetings being held in Canada, in Montreal in 1897, and in Toronto in 1906.

After a week in Winnipeg, the British doctors will be taken through the Rockies to the Pacific Coast, and back again by another line. Thus they will see the prairies, the mountains and the wealth of British Columbia. They then will be taken through the Maritime Provinces.

Would Not Interfere With Ocean Flying

British Air Ministry Thinks Legislation Would Be Unwise

London.—A stand against Government supervision of trans-Atlantic flying was taken in the House of Commons by the air minister, Sir Samuel Hoare. The minister told the Commons that in his opinion it would be unwise for a department of the government to obtain legislative powers of that kind.

He added that while he agreed in the advisability of not attempting such flights until better qualified machines are available, he thought formidable difficulties would be found to stand in the way of any attempt to control by the government.

His statements came in reply to suggestions that the government impose some sort of control on people desiring to fly across the Atlantic to be sure that they possessed adequate knowledge of the air and navigation and properly equipped machines.

Test Pulverized Coal

Will Attempt To Demonstrate Commercial Possibilities Of Fuel

Ottawa.—Development of the commercial possibilities of pulverized coal will be proceeded with immediately by the government. To test and demonstrate possibilities, the government will (a) adapt one of its steamers on the Pacific coast to utilize pulverized coal; (b) use pulverized coal in one of the government buildings in British Columbia.

In making this announcement to the House of Commons, Hon. Charles Stewart, minister of the interior, said he thought there was a bright future for pulverized fuel, especially for use on freighters. Pulverized fuel was no longer in an experimental stage.

The matter was brought up on a resolution by A. W. Neill (Independent, Comox-Alberni).

British Settlers for Canada

A good example of the type of British farm settlers now arriving in Canada can be seen from the above photo taken on the concourse of the Windsor Street Station, at Montreal. This group, which forms part of the 400 settlers who arrived recently on the S.S. Montnairn, are the first contingent this season of British farm laborers brought out under the auspices of the Canadian Pacific Railway Colonization Department.

They possess a thorough farming training, therefore being well equipped for the duties they are to take up in Ontario, where farms have already been arranged for them by the government.

NATIONS FROWN ON DISARMAMENT PLAN OF SOVIETS

Geneva, Switzerland.—Twenty-two of the 25 countries represented on the preparatory committee for a disarmament conference are lined up against the Soviet plan for immediate complete disarmament.

Hugh S. Gibson, the United States; Calixo Whitmarsh, Cuba; Baron Rollin Jacquemyns, Belgium; Jonkeer Rutgers, Holland; E. Heening, Sweden; M. Sokal, Poland, and M. Markovitch, Jugo-Slavia, added their criticisms to those of Lord Cushendun, making the Russian defeat overwhelming.

London.—The Evening News, commenting on the speech of Lord Cushendun, British delegate at Geneva, expressing profound doubt of the Russian scheme of complete disarmament being possible under present conditions, says it is a real treat to see whistling through the League of Nations council chamber for once not a bouquet but a commendably heavy and well-aimed brickbat. "Lord Cushendun deserves the thanks of the civilized world for his judicious and skilful use of his strong right arm," The News says.

The Evening Star editorially says if the League of Nations could be convinced of Russia's good faith the Soviet peace proposals might be assured a friendly hearing.

Wants To Explore Northwest By 'Plane

Toronto Man Makes Application To Department Of Interior

Ottawa.—An ultra-modern mining application made to the department of the interior by Col. Cyril D. H. Alpine, of Toronto, said to be acting for the Lindsley interests, asks for the right to explore by hydroplane the northwest territories north of latitude 60, and at the same time to be given the exclusive right for a limited time to stake mining claims in that area.

The applicants pointed out that it would bring into review the policy of the government in co-operating with private capital in the exploration of extremely remote territories which for the present is beyond the reach of the ordinary prospector. The syndicate would agree to supply the department with air view maps and other information gathered as the exploration was carried on.

No decision has yet been given by the department but it is understood that a measure of the request may be granted. Cost of the exploration would be about $200,000.

Power Contract Closed

Manitoba Company Will Supply Government With 30,000 Horsepower Yearly

Winnipeg.—The Manitoba Power Company has closed a contract with the provincial government to supply 30,000 horsepower annually from its site at Seven Sisters Falls. The contract will operate over a period of 36 years at the end of which provision is made whereby the government can take over the private plant as a publicly owned utility.

According to Hon. W. J. Major, Attorney-General, the power will be sold to the government at a rate of $13.80 per horse power. This figure, he claimed, was the most favorable received anywhere on the continent.

Capture Deer In Vancouver

Vancouver, B.C. While walking along Broughton Street in the west end of the city, two men captured a full-grown deer when it dashed toward them. A number of dogs from nearby residences were in eager pursuit of the animal. Where the deer came from is a mystery. It was uninjured and had apparently travelled considerable distance.

Unemployment Less In Britain

London.—It was announced recently that, on March 12, there were 1,071,700 unemployed persons registered with the government, 22,000 below the number registered a week previous and 47,000 below the number registered March 12, 1927

Dr. Seager Wheeler Tells About Development Of A New Rust-Resisting Wheat

In further explanation of his development of a new wheat from the Kota strain, which promises to be rust resistant to a degree not approached by any other wheat, Seager Wheeler, of Rosthern, has given a statement on his experiments. He says he started with the Kota type which is famous for its rust resistant qualities, but is also noted for a weak straw and poor milling qualities. This variety of wheat is also of the bearded type. In 1923 Dr. Wheeler found that among his plots of Kota wheat were two heads of the beardless class, although positive that it would have been impossible for any other class of wheat seed to have become mixed with this plot.

Believing that, by that accident of nature, the natural cross, that he had something new, Dr. Wheeler kept these two heads separate and sowed the seeds in a separate plot. This was in 1924. In making the miniature harvest of his plots, he noticed that the product of this new experiment plot had broken up into several distinct forms of types, each different from one another, but only noticeable to one who had spent years in the wheat study.

Each of these different strains was planted in separate plots in 1925, which again divided, and at the end of the year Dr. Wheeler was able to count 60 different varieties of his original product, derived from his two heads. Many of these seeds had apparently not been affected by the rust of 1925.

The following year, 1926, there was practically no rust, consequently experiments carried on in this year could not demonstrate the ability to fight this enemy of the farmer. However, it was shown that a grain similar to that of Kota, with beardless heads, with straws of a much stronger description and whose milling qualities were much superior to that of the original strain had been developed.

Not content with this, Dr. Wheeler again carried on his series of experiments last year, and it is as a result of these, carried on in one of the worst rust years of the district, that Dr. Wheeler was able to announce definite results, he said.

Sowing about 80 selections of his original strain, he found that the seeds taken from the Kota product were more successful in warding off the damaging attacks of rust. On all sides (for the experimental plots of this untiring scientist reach for acres) were plots of other types of wheat that he was testing. All of these showed the effects of rust, not only in the stalk, but also in the shrunken seeds. This new type or types developed by him since 1923, showed but little damage. Small spots of rust were seen on the leaves but the seeds were fully developed and not damaged in the least, he said.

When questioned in regard to the future of this wheat, Dr. Wheeler said that he intended continuing his experiments, and believed that by careful selection and observation he would soon be able to give to the world a wheat that although not guaranteed against rust, would be so little effected by it that the damage could be discounted.

Dr. Wheeler pointed out that he was not announcing that he had a wheat that was immune from rust attacks. He mentioned that in the past others had announced that they had a wheat of this type, consequently disappointing those whose livelihood depended on their crops when proved a failure. "What I do say, is that I have a wheat which I confidently expect will prove sufficiently rust repellant to greatly lessen the dangers of loss by rust."

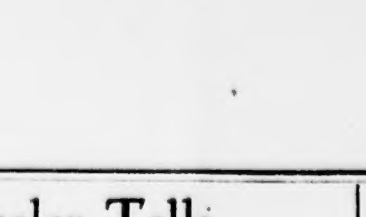
Dr. Wheeler has been growing and experimenting with wheat in Saskatchewan for the past 40 years. In addition to developing such an early ripening wheat as Red Bobs, and carrying on endless experiments in all cereals, Dr. Wheeler has an orchard on his small farm three miles east of Rosthern, in which he grows practically all types of fruit with the exception of those which only survive in tropical countries.

Experiments with Kota wheat to develop a rust resistant type are being carried on by Manley Champlin, head of the University of Saskatchewan, also at Ottawa and in rust research bureaus at Winnipeg and elsewhere. Professor Champlin states that some of the selections being experimented with at the University show fair promise of proving of value to prairie farming.

Ranching In B.C.

Cattle Ranching Said To Be Getting Back To Its Old Stride

The cattle ranching business in British Columbia is getting back into its old stride and the future of the industry is bright in the opinion of C. G. Cowan who, in addition to his own extensive interests in cattle ranches in Cariboo, is agent for the Marquis of Exeter and Lord Egerton of Sutton. Arrangements are being made to carry several thousand additional head of cattle, while 3,000 sheep are to be introduced from Oregon this summer. Altogether Mr. Cowan estimates his companies will put at least $200,000 into purchases of additional stock.



School Smartness For the Young Girl

The frock illustrated gives you an idea how smart a school frock can be when made from flannel, with just the right touch of contrasting color used for collar, cuffs and belt. There is an inverted plait at each side of the skirt front, and the back is plain. The narrow belt fastens with a button at each plait, while the long sleeves are gathered to cuff bands. No. 1397 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2⅛ yards 39-inch material, and ¼ yard contrasting. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Mining in the West

Talc Deposits in Alberta Are to be Developed

"Manitoba is rapidly rising in importance as a mining province," H. B. Lumsden, chairman of the mining bureau of the Winnipeg board of trade and director of the industrial development board of Manitoba, remarked in Montreal recently, on his way to the annual meeting of the Canadian Institute of Mining and Metallurgy, which was opened at Quebec. "In fact, the public as a whole has little realization of the strides being made by Manitoba in directions other than agriculture—and especially in mining," continued Mr. Lumsden.

An important present development in the west, mentioned by Mr. Lumsden as shortly to materialize, is that in connection with large deposits of talc, both of the blue and white variety, in Alberta, about 18 miles from Banff, the blue was quite rare, he said, and was used chiefly in the making of electrical insulators and gas burners, while the white, which was very pure in the region referred to, was the raw material for face powders.

A Remarkable Cow

Wetaskiwin District the Home Of Record Breaking Shorthorn

Wetaskiwin district has the distinction of being the home of a Shorthorn cow which holds the record for all Canada in the productoin of milk and butterfat as a three-year-old. She is owned by J. O. Harvey in the northwestern part of the city of Wetaskiwin, and a letter from Ottawa advises that the production of this cow has never been equalled in Canada. Gladys No. 200699 produced 10,504 lbs. of milk and 509 lbs. of butter fat in a test extending over 305 days. She is now undergoing her test as a four-year-old and is averaging about 58 lbs. of milk a day.

Revenue From School Lands

Nearly Two Million Dollars Collected By Federal Government In Saskatchewan Last Year

Revenues from Dominion and school lands in Saskatchewan during the fiscal year 1926-27 amounted to nearly $2,000,000, according to a report of the Federal Department of the Interior. Revenues originating in this province, chiefly through agencies at Prince Albert and Moose Jaw, amounted to $964,231.69 on Dominion lands, Crown timber, forestry, water power and reclamation, mining and national parks. School lands revenue amounted to $938,428.

Had Heavy Debt

The Boss was tired of being constantly importuned by one of the workers for the next week's salary, and finally said:

"Mose, you're the limit. Say, what would you do if you had all the money in the world?"

"Well, suh," replied Mose, studiously, "de fust thing Ah'd do would be to pay all mah debts—as fah as hit'd go."

Canada Spends Huge Sums In Construction and Maintenance Of Good Roads Coast To Coast

There are now in Canada more than 150,000 miles of improved roads that are kept in good condition during the touring season, and in some districts during the winter months as well. In addition there are thousands of miles of roads of less costly types that are suitable for motor traffic. The construction and maintenance of all these roads have cost the Canadian an enormous sum of money. Highway improvement projects undertaken in co-operation by the Dominion Government and Provincial Governments under the Canada Highway Act of 1917 covered only 8,688 miles of the total road mileage of the country. Yet they involved a total investment of almost $49,000,000, of which the Dominion undertook to pay $19,596,388, and had paid $18,775,604 up to the end of March, 1927. Expenditures made for road construction and maintenance throughout the Dominion amounted in the one year 1926, to $45,500,000, of which almost $16,000,000 represented the cost of upkeep. Furthermore, there is reason to believe that expenditures of the kind will continue.

The Canadian people's investment in good roads has facilitated travel between centres of population throughout the Dominion. It has undoubtedly had an influence upon social and business relations between inhabitants of the country. It has afforded new means of access to the summer holiday grounds and to the most beautiful sections of the land. These advantages the expenditures on highways have procured for the Canadian people. Those expenditures have also helped to attract visitors in large numbers from the United States. In 1927, 3,153,800 touring motor cars came to Canada from the United States. The travellers in those cars, it is estimated, spent $276,288,150 in this country, as compared with $203,197,820 that tourists of the kind disbursed here in 1926. In 1927 Canadians visited the United States in 495,929 cars and spent there a total of $70,000,000, it is estimated. Thus in that year Canada showed a favorable balance of $200,000,000 in tourist trade.

The influx of tourists from the United States was beneficial to the country in more than one way. The visitors incurred travelling expenses in Canada, and in that way put money into circulation here. Under the tariff law of the United States, it must be remembered, each tourist was permitted to carry home with him, free of customs duties, goods to the value of $100 that were bought in Canada. Many of the tourists availed themselves of this provision of their country's law, and so contributed to the volume of business done last year by Canadian traders. Furthermore, it is probable that many of the tourists helped on their return home to advertise Canada's attractions as a summer resort, its resources and the opportunities it offers for the investment of capital.—Toronto Mail and Empire.

A Dairy Province

Alberta has rapidly become a dairying province in the last few years. In 1927 her production in this department was valued at $20,750,000, of which $5,478,000 came from 16,425,000 pounds of creamery butter and $161,300 from 849,000 pounds of cheese, the latter being a comparatively new industry.

Feeding Young Turkeys

Must Not Be Fed At All Until 48 Hours Old

Some good advice on the feeding of poults is given in a Dominion Experimental Farm bulletin on turkeys. According to the bulletin ,the baby turkeys should not be fed at all until they are at least 48 hours old, and even sixty hours without food is not too long. The first feed, given in the morning, should be chick size oyster shell scattered on a small board, and sour skim-milk. Towards the end of the afternoon they should be given some hard boiled eggs chopped fine. Regular feeding should be started the next morning with hard boiled eggs and bread crumbs mixed together and given three times daily. After one week the egg may be gradually discontinued and the feed consist of bread alone. After the second week a little moist shorts are added, discontinuing the crumbs until the shorts alone are used. All these changes should be made gradually. Sour milk, grit and oyster shell should be given daily from the start. Never over feed or offer anything that has been mixed for previous feeding. As the poults grow they will travel over a wider range until very little feeding is necessary. The bulletin, which deals with the care and management of turkeys, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Growing Flax For Fibre

May Be Harvested By Cutting Instead Of Pulling

The slow progress that has been made in the growing of flax in Canada for fibre has been due to a considerable extent to the old idea that the flax plants have to be harvested by pulling. Experiments in harvesting at the Experimental Farm at Ottawa indicate that flax that is harvested by cutting can be made into a high grade tow. By harvesting the crop in this way one of the most expensive items of culture is largely overcome. The significance of this conclusion is that flax may be grown over a very wide area of Canada and not confined as it has been largely in the past to districts where Indian labor could be secured cheaply to pull the crop.

Horse Meat For Belgium

A market is being found for the cayuse of the Okanagan, which are being rounded up in the hundreds by the Government. A Butte, Montana, meat firm is taking 700 of them, to be slaughtered at Butte, it is said, and the hams pickled and sent to Belgium.

Slogan for suppressing a Latin-American revolution: "Shoot the generals and you shoot all."

Office Force on Popular Cruise

As the result of a promise to his employees, for the faithful service given to him covering a period of several years, C. L. Brown, president of the United Trust Company, Abiline, Kansas, sailed recently on the four weeks cruise of the Canadian Pacific liner "Montroyal" bound for a tour of the West Indies, accompanied by seven women employees.

The president made a promise that he would take seven of his most efficient office girls on this cruise, the choice being left to the entire force who ballotted as to who should be the fortunate ones. Mr. Brown is travelling with his wife and daughter who are seen on either side of him in the above photo.

"I must appear ridiculous like this."

"Oh, no. It shows that you will be very useful for cleaning the floors."—Pages Gaies, Yverdon.

LESSON No. 14

Question: **Why is *emulsified cod-liver oil so* efficient and *so* beneficial a food-tonic?**

Answer: **Because it is *so* easily assimilated and quickly builds up strength. Multitudes use it every day as in**

SCOTT'S EMULSION

Progress In Civil Aviation

Twenty-One Organizations Are Now Operating In Canada

The reports of the civil organibations operating aircraft for the year 1927 show an all-round increase in all forms of aerial activity.

The organizations operating aircraft have grown from 10 in 1925 and 16 in 1926, to 21 in 1927. The mileage flown has risen from 255,826 in 1925 to 825,010 in 1927.

Passenger traffic showed a tremendous advance, due very likely to the increasing popularity of short pleasure flights.

The accident returns for licensed aircrafts and pilots show a decrease of one in the number of flying accidents causing death or injury, of which there were four in 1927 and five in 1926. These involved the death of two pilots and two passengers and the injury of one pilot and two passengers as against two persons killed and eight persons injured in 1926.

Charleston Dance Contest Judged By England's Leader

Miss Leslie—Sutton, chief judge of the Charleston contest for England, writes: "My unique position in the dancing world today would never have happened if I had not taken care of my health.

I constantly had that tired out, depressed feeling, with sick headache, indigestion, biliousness caused by the poisons of constipation.

Your mild laxative has been of valuable assistance in keeping my system in a daily healthy condition."

CARTER'S LITTLE LIVER PILLS
All druggists—25c and 75c red pkgs.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XXI.—Continued.

In the City all the street sounds this Christmas Eve were harsh, cold and hollow. Street cars clanged and shrieked and roared through the Subway; horses' feet pounded on the pavement like blows on an anvil, and automobile brakes seemed to scream in fright and pain. Many a person turned hastily, expecting to see an accident, only to find it was just a car stopping. Cold, gray and hard lay the city on this day which should be the brightest of the year.

In the very grayest part of the day, when the sunlight was fading and the lamps were not yet lighted, the snow began weaving its changing patterns through the waiting air. The country people saw it falling, and said it had kept off well, and hoped for the sake of the cattle, that it would not fall too deep and cover all the grass. Snow was an old story to them, making them think of blocked roads, and paths to shovel to the stables, and, worst of all, hungry cattle looking for food. But in the city the snow got a royal welcome.

"Now it does look like Christmas," the people called to each other on the street through their wet fur collars, as they hurried along with their shopping bags dropsical with last-minute Christmas gifts. The red bells in the shop windows suddenly grew brighter, as if a candle had been lighted in them, and the Christmas wreaths sparkled through the splinters of frost that began to come on the windows, for with the approach of nightfall the cold increased. The hurrying bakers' wagons and coal-carts made frosty music on the snow, which in half an nour had covered the frozen ground. The Salvation Army captain on the corner slapped his red-mittened hands together to keep them warm, and blessed the falling snow because he knew it would help people to remember whose birthday it was tomorrow. As he rapped his cane on the pot and made it ring out its silvery summons, he called more heartily to all good Christians to keep the pot boiling.

"Help to provide Christmas cheer for all the lonely and homeless in our city, he cried, "Too bad for anyone to be hungry or sad tomorrow—Thank you, Sir—God bless you; and you, too, ma'am—Keep the pot boiling, remember our Blessed Lord! Keep the pot boiling! Christmas comes but once a year!"

A man in a coon coat walked hurriedly by, without contributing. The captain tried in vain to catch his eye.

"You won't get anything from me," he was saying to himself, "to feed a lot of lazy bohunks that would not take a job when it was offered to them. By Gosh! don't I know them? Everything comes out of the farmer these days—trimmed at every turn—but here's one place I won't bite anyway—I have all I can do to keep my own pot boiling."

He turned into the Dominion Cigar Store then, remembering that his stock of tobacco was low.

A crippled man on two crutches, back from the war, stopped to throw in the coin which he extracted with difficulty from his pocket.

"God bless you, brother!" cried the captain; "your legs may be on the blink, but your heart is all right—God bless you!"

"He has—He blesses me every day," smiled the lame man; "I'm lucky to be alive."

"You bet you are! Come on, good people, it will do you good to give; it will make your own dinner taste better tomorrow."

A young girl with hair of fiery gold, hat awry, flushed face and weary eyes, stood in a doorway across the street. She had laid down her heavy valise for a moment to rest her aching shoulders. The crowd of Christmas shoppers surged past her, some of them young girls of her own age, giggling, scuffling, incoherent in their gladness. She shuddered as she looked at them. There were young mothers, too, herding excited children who had been to see Santa Claus in the toy department of one of the big stores. Each of them carried a balloon, red, green and blue, bobbing gayly. The little children—the believers—were rapt and quiet with the wonder and glory of their visit—the older ones noisy, greedy, imperative, demanding.

Helmi Doran, not much more than a child herself, suddenly wanted one of the balloons, the like of which she had never seen; then as suddenly she remembered!

She must ask someone where to go, but no one even looked at her, they were so busy, so happy, so absorbed. The snow on the street muffled their footsteps, but the clanging of the street cars and their piercing steam-whistles were alarming to her, and the dual movement of the snow falling and the people passing was confusing. She began to feel dizzy as she once did when fording the McLeod River, the rushing water of which had turned her head. She seemed to be going, going, with the street and all the people. Then came a definite, horrible feeling of alarm. She seized her valise and went on.

The Army captain, relieved at that moment by the arrival of the adjutant, noticed her drooping shoulders as she went past him, and hurried after her. "May I help you?" he asked with friendly interest.

Helmi's lips were dry and stiff, and she shook her head.

"Have you friends here?"

She shook her head.

"You can get a room at the North Star Rooming House, if you are looking for one," he said. "See, it is just ahead of us; shall I carry your valise?"

Helmi hurried on without answering. He noticed that one overshoe was unbuckled and the loose tongue of the buckle had caught in the hem of her dress and was tearing it as she walked.

In her dire need of haste Helmi did not even know it. Reaching the "North Star" she walked up the stairs to the front door and entered without knocking. Mrs. Maggie Corbett, wife of the janitor, who happened to be coming out at the same moment, met her and cried out in astonishment. "God love you, poor girl! Where are you going'?"

Helmi's pain-twisted face told its own story.

Mrs. Corbett hurriedly put down the twine bag with which she had been going forth for a last shopping bout.

"I could see," said Mrs. Corbett afterwards in telling the story, "that the poor young thing would be worse before she was better, so I shut me trap, for it was sure no time for an argument, and I took her up the stairs to No. 18, which, thanks be to God, was empty, and I roared at the top of my voice for Mrs. Kalinski, who was in No. 19, to come and help me, and we got her into bed; and then Mrs. Kalinski, who was expectin' her own trouble to come out in the crook of her arm, ran back into her room and like the good Christian she is, though she is a Jew, she brought in her own little basket with the dotted muslin over the blue sateen, and everything in it that we needed, the burnt linen and all, and in half hour it was all over and the little beauty was lying on the foot of the bed with a smile on her face as if she had won a bet on some wan that she had a spite at!

"Sure, we thought first it was wind on her poor little stomach she had, and we got the nice little hot-water bottle that Mrs. Kalinski had ready for her own little Jacob, and put it in the blanket with her, but the more I looked at her pretty face, the more I saw she intended it for a grin and nothing more or less, and then I told her that with her poor mother so low, and probably not another friend in the world, and not a stitch to her back, she had blamed little to be smilin' at!"

All that afternoon Helmi lay debating, considering, pondering. Would she go or would she stay. It seemed a good place to step out—perhaps she might get a chance to try life again, or maybe would be let just lie still like this. That would be the best, just to lie like this where everything was warm and quiet and nothing mattered. Though her eyes were closed tight she could see the snow falling—covering her up, weaving, rolling, eddying around her, and burying her deeper and deeper. She loved the feel of it on her face, which was so hot and dry and burning; and on her heart, which was so sore; and she hoped the snow would keep on falling until her heart would be buried so deep she could not feel it aching.

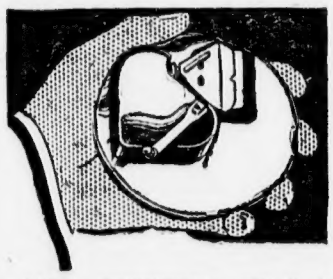
(To be Continued)

Little Helps For This Week

"Ask, and ye shall receive."—John xvi. 24.

O Dumb, deaf, blind, receive!
Shall He who made the ear not hear your cry?
Doth He not tenderly see who made the eye?
Ask Me that I may give.
—Adeline D. T. Weitney.

There is nothing too great, nothing too small, for us to bring to the One of all compassion. I think it is the going to God with our every want that He loves. Hence the oftener we go the more we please Him, for our asking for the, to us, seemingly little things, is but demonstrating our entire dependence on Him; and surely this dependence, this trust, is what makes us the children of our Heavenly Father.—Rose Porter.



A NEW INVENTION THAT IS GOING TO BRING COMFORT AND PLEASURE TO THE SHAVER

Every once in a while we read of someone who has come along with a device for prolonging the life of Safety Razor Blades and at the same time supplying more shaving comfort, but it rests with a St. Louis man to place on the market what is undoubtedly the finest thing of this kind which has appeared.

It is called KRISS-KROSS, the super-stropper. This unique invention, based upon a secret principle used by barbers for generations for sharpening their razors, has just been placed on the Canadian market by the Kriss-Kross Co., 39 Wellington St. E., Toronto.

There is an automatic timing signal on this stropper, which gives the keenest edge steel can possibly take and it only requires eleven seconds in which to perform the task. There is no doubt but what Kriss-Kross will enjoy a particularly big volume of sales, as it is compactly built, reasonably priced and will last for many years, giving the user a vast amount of satisfaction and the pleasure of not having to continually dip into his pocket to purchase new blades. This new device will enable the user to employ one blade indefinitely.

Nations Must Agree

It would be a great thing for civilization if the submarine could be abolished. But that will not happen so long as one government holds out for it. It and when the submersible ceases to be an instrument of war, the nations should make the occasion doubly happy by prohibiting poison gas also.

"Are you still looking for your lost sixpence, little boy?"

"No, ma wee brither f'und it."

"Then what are you looking for?"

"Ma wee brither."

A large type of war vessel of the sealing days, heavily armed, and corresponding to the modern cruiser, was called a frigate.

On fishing trips take Minard's.

Alberta Fish Resources

Alberta has been developing her commercial fish resources rapidly in the last five years. The value of the 1927 fish catch was $867,000 from 9,000,000 pounds of fish.

AVOID THE PAINS OF RHEUMATISM

This Trouble Comes Through Weak, Watery Blood

Many people suffer rheumatic pains that could be avoided by building up the blood. Rheumatism comes with thin, watery blood, and can only be driven out of the system by enriching and purifying the blood. To make rich, red blood no medicine equals Dr. Williams' Pink Pills. These pills actually make new blood, driving out all poisonous secretions, and creating a condition of robust health. Thousands of rheumatic sufferers can testify to the value of Dr. Williams' Pink Pills. Among them is Mr. Jos. A. Tully, Bobcaygeon, Ont., who says:—"As a worker in the woods for years I was exposed to all kinds of rough wintry weather. The result was that I was finally laid up with rheumatism. I could hardly stir, and was confined to bed. Medicine seemed to have little or no effect and the best encouragement the doctor gave me was that with the coming of warm weather I would be better. But instead of getting better, I grew worse. My joints were badly swollen, and my legs so stiff they would hardly support my body. At this stage I read that Dr. Williams' Pink Pills were recommended for rheumatism and decided to try them. The results were beyond my expectations. After a few weeks the swelling had disappeared, and the stiffness gradually wore away, and much sooner than I expected all traces of rheumatism had disappeared. The next winter when I went into the wood I took a supply of Dr. Williams' Pink Pills with me, and they kept me in the best of condition. My experience should give encouragement to other rheumatic sufferers."

You can get these pills through any dealer in medicine, or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Money In Tourist Traffic

Tourist traffic brought Alberta a revenue of $30,000,000 last year, so Hon. R. G. Reid, Porvincial Treasurer, states in his annual budget report.

SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's Vegetable Compound Could Do All Her Work and Gained in Weight

Melfort, Saskatchewan. — "I had inward troubles, headaches and severe pains in my back and sides. I was so sick generally that I could not sit up and I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of sorts or weary and can't sleep I always take another bottle of the Vegetable Compound. I find it wonderfully good for female troubles, and have recommended it to my neighbors. I will be only too glad to answer any letters I receive asking about it."—Mrs. WILLIAM RITCHIE, Box 486, Melfort, Saskatchewan.

ECZEMA BROKE OUT IN RASH

Child Very Cross and Fretful. Cuticura Heals.

"When my little sister was four months old eczema broke out in a red rash which later formed blisters. It itched and burned causing her to scratch. She was very cross and fretful, and used to lay awake half the night. The trouble lasted six months.

"A friend recommended Cuticura Soap and Ointment so my mother purchased some and after using five boxes of Cuticura Ointment and three cakes of Cuticura Soap all signs of the trouble disappeared. She was healed." (Signed) Mrs. Thomas Canning, Clarksville, N. S.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address: Canadian Depot: "Stanbaco, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

Pains Across Kidneys For Two Years

Unable to Work

"Gin Pills—Wonderful Remedy"

We receive thousands of letters yearly from grateful users of Gin Pills, who have been relieved of suffering from kidney and bladder trouble. When Nature fails to do her proper work of eliminating harmful waste through the kidneys, bladder and bowels, a remedy must be found. Many people have found Gin Pills to be this remedy. Among them, James Johnson of Bridgeburg, Ont. He writes:

"I was troubled with pains across the kidneys for two years. I was unable to do any work. I read about Gin Pills and got a box right away from my druggist. My sincere thanks are due you for your wonderful remedy, which has done so much for me."

Neglect of kidney trouble spells disaster. Lumbago, Rheumatism and Sciatica as well as bladder and urinary troubles follow. Upon the first warning get a box of Gin Pills, 50c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada. 127

DON'T MISS IT

A school of instructions will be held at the Union Tractor and Harvestor Co's. new building, corner of 9th. Ave. and 8th. St. W. Calgary from April 2nd. to 5th. on the Holt Combine and Caterpilar Tractor. These machines will be torn down and rebuilt by experts from the factory and we feel that every farmer should take advantage of this free education and attend.

Owing to the illness of the pastor, Rev. C.B. Oakley, the service in the United Church on Sunday night was conducted by the C.G.I.T., the Tuxis boys and the Trail Rangers. G. Peters and Wilfred Poxon led in prayer, Cyril Poxon read the Scripture, and Hugh MacDonald gave part of his oration on 'Canada's Future. Mrs. Torrance and Mrs. G. Peters song a duet, and Mrs. Torrance favored the congregation with a solo. The choir was composed of members of the C.G.I.T., Tuxis Boys and Trail Rangers.

Mr. and Mrs. S. F. Torrance were visitors to Calgary last week and returned on Saturday.

Mr. and Mrs. P. Turcotte and family left last Wednesday for Maple Creek, Sask. where they will reside in future.

Mrs. T.R. Olive went into Calgary last Thursday to have her tonsils removed. She returned on Monday.

Mr. and Mrs. Laing's party, which was to have taken place on March 30, has been postponed indefinately.

Rev. C. B. Oakley is making plans to have a big religious gathering in Carbon about the first or second week in June and plans have already been made to secure such prominent speakers as Revs. Dr. Kerby, Geo. Dickson, W. H. Avison and W. E. MacNiven, of Calgary. This is the first undertaking of its kind to be taken in the Province, but it has received the unanimous support of these well known men and Mr. Oakley believes it will be a great success.

R. H. White is putting on a wild west demonstration next Saturday. See the posters.

Use Your Best Judgment in Your Choice of a USED CAR

IT will pay you to select the Used Car you purchase with the same care and judgment as you would show in buying a new car. Buy from a dealer who has a reputation for honesty and fairness . . . a dealer who is successfully selling a well-known and respected line of cars. We can offer you better Used Car values because of our volume of Chevrolet business and because we are building for the future. And we want you to buy your used car carefully, because a satisfied customer means more to us than the profit on the sale. Come in and inspect some of our special values before you decide on your car.
